Cat Medical Boarding Suites

South East Queensland

Going on holiday when you have a cat with medical problems is difficult.

We love our patients and designed a special boarding facility to provide a “home away from home” where cats receive the medical care, observation and love they need and deserve while their owners are away. Our hospital is feline only which reduces anxiety for cats. Every suite has ramps, multiple sleeping places and natural sunlight. We will also tailor behavioural enrichment plans such as playrooms, cat TV and grooming time based on what your cat would like.

Our highly trained staff monitor your cat closely, including daily assessment of body weight and recording how much your cat eats. Our feline nurses can administer all medications including asthma inhalers, insulin injections and tablets.

**Our hospital is staffed 24 hours a day,
7 days a week, so medication timing is not
a problem.**

The beauty of our medical boarding suite (and the reason for its existence) is that if your cat does become unwell, they are already within our hospital building. Therefore, our feline vets are always at hand to check your cat if there are any concerns.

**We love cats and we love providing
them the best care**
